TITAN'S RICHES

Descending Wild Respin

When one or more Wild symbols land on the reels, all wins are awarded for that spin. Then, each Wild symbol descends one position down on the reels and a respin is awarded. The Descending Wild Respin process keeps repeating until all Wilds have left the reels and then a last respin takes place to crank up the payouts.

WoW (Wild on Wild)

If a Wild symbol lands behind a Descending Wild, the WoW feature is triggered and the Wild then expands over the entire reel for even more payout potential. The WoW feature can occur in both the base game and Free Spins.

Titans Riches Feature

Collect silver and gold coins while playing. When 6 or more silver coins have been collected, it triggers the Titans Riches Feature. The collected silver coins are then randomly placed on the reels and each has a random credit prize value on it. Any collected gold coins are then added randomly to any open positions and each has a random multiplier value. The coins then hold their positions, and 3 respins take place with the possibility of more silver coins filling the empty positions. Each time a new silver coin fills an open space, it holds its position and the respins reset to 3. The feature ends when all 15-reel positions are filled with coins or no more respins remain. The values on the coins are then awarded.
